Tyrosine normal/elevated; Elevated Succinylacetone

Assay
Plasma amino acids
Plasma AFP
Urine organic acids

Tyrosine normal/elevated; Elevated Succinylacetone

Routine Labs:
Glucose, electrolytes, LFT, AFP

Tyrosine - normal/elevated
AFP - high
Succinylacetone - elevated

Tyrosinemia I

Normal

Rule out sample mix up at birth place

Optional confirmatory testing:
FAH gene sequencing

Abbreviations:
AFP – alpha-fetoprotein
FAH: Fumarlyacetooacetate Hydrolase
LFT – liver function tests

Disclaimer. This guideline is designed primarily as an educational resource for clinicians to help them provide quality medical care. It should not be considered inclusive of all proper procedures and tests or exclusive of other procedures and tests that are reasonably directed to obtaining the same results. Adherence to this guideline does not necessarily ensure a successful medical outcome. In determining the propriety of any specific procedure or test, the clinician should apply his or her own professional judgment to the specific clinical circumstances presented by the individual patient or specimen. Clinicians are encouraged to document the reasons for the use of a particular procedure or test, whether or not it is in conformance with this guideline. Clinicians also are advised to take notice of the date this guideline was adopted, and to consider other medical and scientific information that become available after that date.
