### **Ask Congress to Support Patient Access to Necessary Medical Nutrition**

Despite the ability to manage certain inherited metabolic disorders through medical foods, many patients struggle to get insurance to cover this critical nutrition. [H.R. 2501, the Medical Nutrition Equity Act](#), would change that by requiring public and private health insurers to provide coverage for such medically necessary nutrition. However, your help is needed to secure the congressional support necessary to pass this important legislation.

As part of Medical Genetics Awareness Week, please help ensure patient access to medical nutrition by sending a letter to your US representative today asking him/her to cosponsor H.R. 2501, the Medical Nutrition Equity Act. To make it very easy, ACMG has provided a template letter that can be sent directly to your representative – all you have to do is fill in your name and address!

Click [here](#) to support newborn screening by sending a letter to your representative.
